## **Priority**

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

## Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to an apparatus for setting a battery alarm voltage for a mobile information terminal. Each independent claim identifies the uniquely distinct features "an alarm voltage detecting unit that detects a battery alarm voltage for alarming a voltage drop of the battery; a suspend voltage detecting unit that detects a suspend voltage at which the mobile information terminal enters a suspend state following the voltage drop of the battery; and a terminal communication unit that transmits the voltage of the battery detected to the battery management server, and the battery management server includes a voltage controller that automatically sets the battery alarm voltage based on the voltage of the battery detected; and a server communication unit that transmits the battery alarm voltage set to the mobile information terminal". The closest prior art, Hayes, Jr. (US 5,726,636) and Murphy (US 6,236,326) disclose conventional low battery alarm for mobile devices, either singularly or in combination, fail to anticipate the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Art Unit: 2632

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Hayes, Jr. (US 5,726,636), Murphy (US 6,236,326), Koizumi (US 6,678,538) and Liebenow (US 6,459,896) are cited to show a variety of low battery alerting mobile devices.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan N. Pham whose telephone number is (571) 272-2967. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel J. Wu can be reached on (571) 272-2964. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
